## Washington Street Project Update - Request for Businesses

### WASHINGTON STREET PROJECT UPDATE:

1/25 - 1/29/2016

Waterline crews will finish installing the 12" waterline depending on the weather. Once line is installed testing will go under way.

Conduit crews will finish installing 1" PVC conduit from Pendleton towards plains depending on the weather. Then stand by for dominion power to remove electricity from poles so the poles may be removed.

Delivery of materials will be starting tomorrow at the South Madison staging yard.

Once the underground conduit is in place, the contractor will begin the next, much larger phase of the project. This will entail brick sidewalk repair, as well as the installation of new street lights, intersection curb extension and brick crosswalks. The first step in this new phase is removing the old street lights so that the sidewalk repair can be completed and bases for the new lights prepared. Depending on how quickly Dominion Virginia Power can disconnect the power to the old lights, the contractor hopes to begin removing them within a few weeks. This means that Washington Street will be without street lights for an extended period of time. New street lights are projected to be phased into service between May 30th and the end of September, with the full project date still scheduled for completion by the end of November.

## **REQUEST FOR BUSINESSES/OWNERS OF BUILDINGS ON MAIN STREET:**

**Please leave your outside lights/porch lights on at night.** This will help with safety during the winter nights. Thank you for helping to keep our town lit up!
